Palamaner,

To
The Principal,
Mother Theresa institute of engineering & Technology,
Palamaner.

Respected Sir,

Sub: Requisition for Permission to Conduct - A One Day Seminar on
“HAZARDOUS WASTE MATERIALS”-Reg.

I would like to bring to your kind notice to conduct a seminar entitled A One Day Seminar on “HAZARDOUS WASTE MATERIALS” for all Civil students. Here I am requesting you sir please give permission to conduct the SEMINAR on 28-02-2017. This Seminar may enhance the students’ knowledge on hazardous waste materials

Thanking you sir,

Permitted

M.T. 24/2/17

DEPARTMENT OF CIVIL ENGINEERING

Report-On

“Hazardous Waste Materials”

(28-07-2017)

As the Department of CIVIL conducting the one day seminar on Hazardous Waste Materials organized for students of CIVIL on 28th JUL 2017. The technical team has given extensive knowledge on Hazardous Waste Materials.

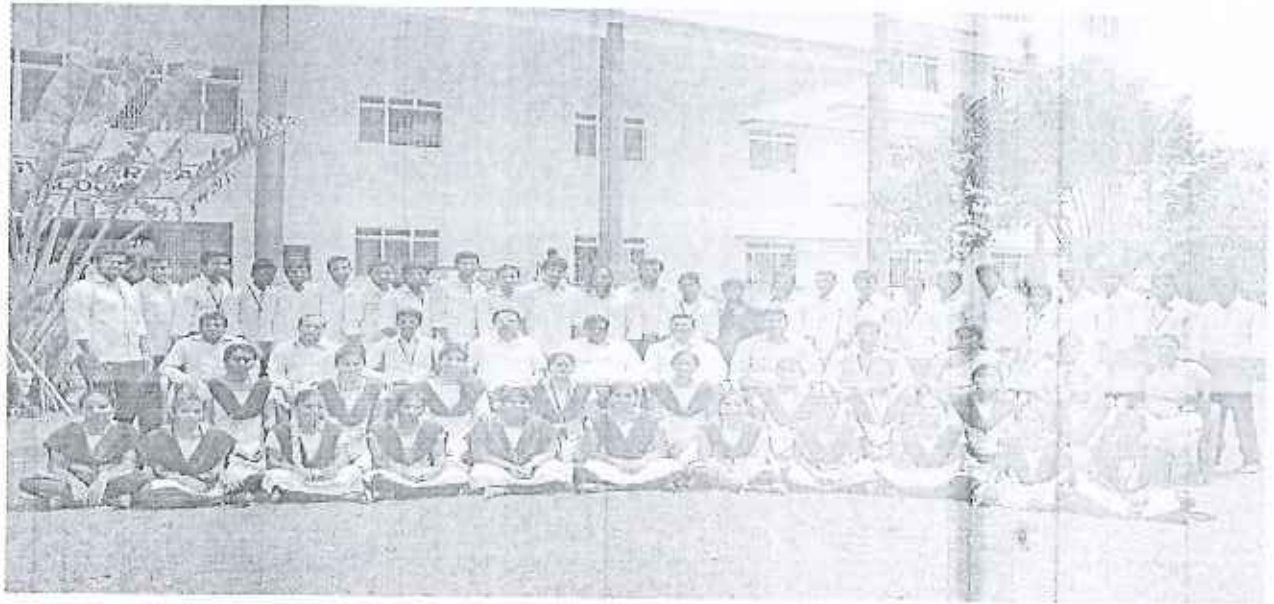

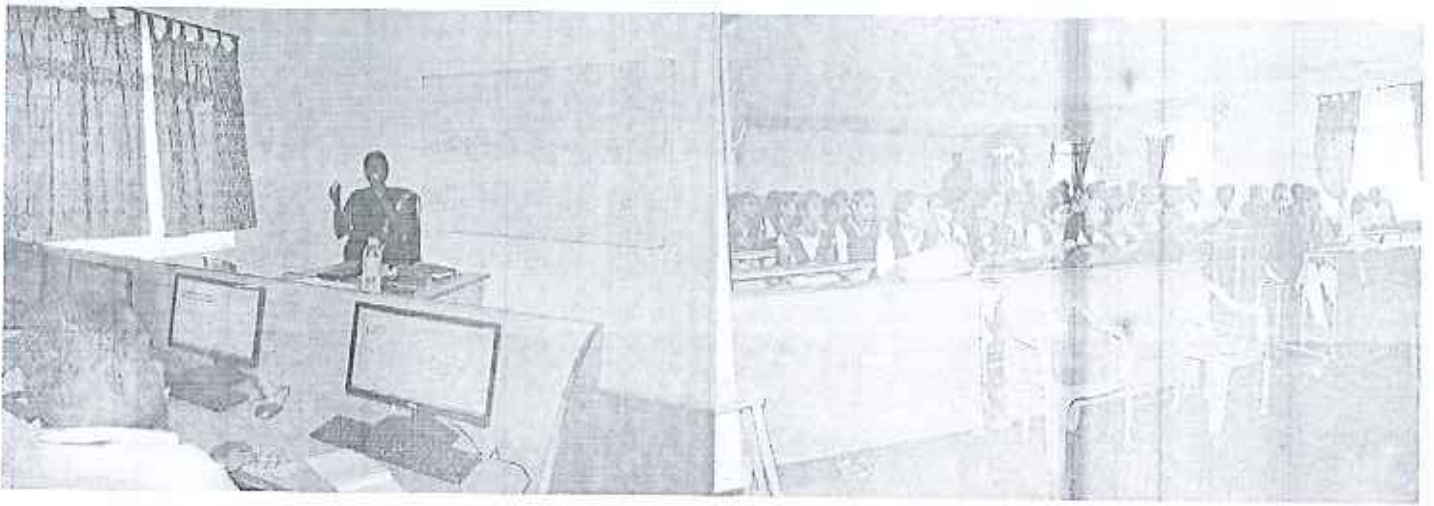

This program was organized by B.B.C.O.Prasad, Head of the department with the co-ordination of Mr. B.Veeresh, Assistant Professor, and Civil Department.

The Webinar was organized for one day effective from 28-07-2017 with a total duration of 8 hours. All the CIVIL students were benefitted from this seminar. The program was held in CIVIL Seminar hall for inauguration, theory and technical session practical were conducted in field.

The trainers have given excellent presentation on solid waste management issues rose to new heights of public concern in many areas because of increasing solid waste generation, shrinking disposal capacity, rising disposal costs, and public opposition to the siting of new disposal facilities. These solid waste management challenges continue today, as many communities are struggling to develop cost-effective, environmentally protective solutions. The growing amount of waste generated has made it increasingly important for solid waste management officials to develop strategies to manage wastes safely and cost effectively. Under RCRA, hazardous waste generators are the first link in the hazardous waste management system. All generators must determine if their waste is hazardous and must oversee the ultimate fate of the waste. Furthermore, generators must ensure and fully document that the hazardous waste that they produce is properly identified, managed, and treated prior to recycling or disposal. The degree of regulation that applies to each generator depends on the amount of waste that a generator produces.

The Seminar successfully enhanced the confidence levels of each and every student for future attempts of improving career prospects.

The total program is successfully completed with the cooperation of each and every faculty member of the department and student participants.
